Problem Statement: There is a local gaming studio in town - 'Delta Games'. They want to develop an e-commerce app where they can sell their products.

They have introduced a unique service that allows customers to rent games on an hourly basis. Charges start from Rs.100 for 5 hours and increase based on demand. A fixed refundable deposit of Rs.500, per game, is charged. Users have to select how many hours they wish to keep the game and when they want the game using the easy delivery and pick up service.

1. Product details Page

2. Cart page

The screenshot shows the 'Delta Games App' interface on a mobile device. At the top, there's a search bar and a shopping cart icon. Below the search bar, the cart is titled 'Cart Items: 1 Item'. The item is 'Item 1', which is a game for rent. The item details include a placeholder image, a 'Name' field, 'Genre' and 'Ratings' fields, a 'QTY' dropdown, and a 'Hours' spinner set to 5. Below these are 'Delivery Time' and 'Pick-up Time' dropdowns, currently set to '1:30 PM' and '6:30 PM' respectively. A table at the bottom of the item details shows 'Price: 100', 'Refundable Deposit: 500', and 'Subtotal: 600'. A blue button labeled 'Proceed to Checkout' is at the bottom of the cart.

Item 1	
Action: Rent	
	Name
	Genre
	Ratings
QTY	Hours 5
Delivery Time	Pick-up Time
1:30 PM	6:30 PM
Price:	100
Refundable Deposit	500
Subtotal:	600

Proceed to Checkout

If you change the hours, the pick-up time is automatically increased. If you change the pick-up time, the hours change. Minimum option for hours is 5.
